121205 Aquifer Exemption Package.pdf

George,

We have received this AE application from an operator in our District 3 in Orcutt. They are going to undertake a cyclic steaming program in the Sisquoc zone outside of the currently shaded areas productive limits of the field, 1974 map) in Cat Canyon field. I'm sending this to you for your heads up and comments – I know as we go along this process, we will make this document more responsive to your requirements for a proper review. The area being requested is really the extension of the shaded area (productive limits of the field) based on our latest Division map (1991) in the East and Central areas.

Kindly have a look and I'll call you tomorrow to solicit your comments. Thanks.

Jerry
